

## NUT-TAPS ( AMB)

State-of-the-art production methods demand highest precision in the manufacturing of internal threads and connecting elements.

Neoboss meets the increasing requirements of the fastener industry with a tailored range of various standard taps and special tools. Neoboss nut taps for almost any application!

We offer **nibs for welding**, as well as **nut taps** with straight shank, or already bent.

### Your Advantages:

- > individually developed geometries for a wide range of applications and materials
- > long tool life
- > true running accuracy
- > designed to user specification, engineered for different types of machines
- > top quality coating for excellent performance

## Machines and applications

## AMB-Versions

### Type L

Straight

### Type H

Nibs for welding

### Type G

Bent

## Production range (specials on request)

- Material: steel up to 1200 N/mm<sup>2</sup>
- Nut taps for »over-flow« process and also »in-and-out« method
- Tolerances according customer's specifications
- Metric / metric fine, American / British threads, JIS Taps
- Dimensions M6–M12 standard Neoboss type available from stock
- Used in Topcut / T-Star (Streicher Maschinenbau), MAS / GA (Hilgeland-Nutap), Shimazu
